

The Carlyle House – Our Assisted Living Solution

Imagine, if you will, the perfect place for your loved one (s) who can no longer live on their own. What would you want their new home to look like? What types of activities would be available to them? What kind of food would they be served? Most importantly, what kind of staff and care would they be given?

My husband and I were faced with these questions regarding his lovely mother. We could no longer meet her needs in our home so we began looking at facilities that were available; we realized that what we wanted for Mom might not even exist. It was depressing and overwhelming!

A Memory Care Advocate recommended we take a look at the Carlyle House which was just opening in Kettering, Ohio. We learned that the developer was designing the facility with his own Mother in mind, modeling it to resemble the Carlyle Hotel in New York. We were pleased to discover that the Chefs were taking care of the meals, that friends and family were always welcome to visit and that the staff worked together to ensure that the residents were treated with compassion and love.

When we toured the facility (which was still under construction) and found that the Developer, Director, Nurses and other Staff Members were working together to meet the Open House deadline, we knew that we had found Mom's new home. Everyone was working towards a common goal – and that goal was and continues to be – providing a beautiful and loving home for our loved ones who are no longer able to live independently.

We strongly recommend the Carlyle House. We know it is the best place in Dayton Ohio for Assisted Living. In fact, we liked it so much for Mom, we recommended it to my cousin and now my Aunt is also enjoying the Carlyle House!

Sincerely,

Doug and Roberta
